CS112 (LFA): Lab 5

May 3, 2023

Note 1. *Individual discussions about homework.*

Exercise 1. *Implement a library/program in a programming language of your choosing that creates a PDA and convert it to a CFG. Use your library from lab 4 to generate the CFG based on input file. Allow command line arguments to your program in the form:*

$$conv_pda_2_cfg_engine.py \quad pda_config_file \quad converted_cfg_config_file$$

Exercise 2. *Create configuration files for PDA 2.4 and 2.6 (Sipser - Chapter 2).*
